## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-23 are allowed over the prior art.
2. The following is an examiner's statement of reasons for allowance: regarding claims 1 and 18, the primary reason for the allowance of the claim is due an apparatus for adjusting small-signal compensation in a switch regulator comprising, in combination with other limitations, a control circuit that is arranged in a feedback loop of the switching regulator such that the switching regulator has a loop transfer function with a second-order pole and a zero, wherein a location associated with the zero is dynamically adjusted by at least one of the feedback circuit. Since claims 2-17 depend from claim 1 and claims 19-20 depend from claim 18, they also have allowable subject matter.

Regarding claim 21, the primary reason for the allowance of the claim is due to a method for adjusting small-signal compensation in a switching regulator comprising, in combination with other limitations, dynamically adjusting at least one zero in response to the measured parameter with a zero adjustment circuit, wherein each zero is associated with a closed-loop transfer function for the feedback loop in the switching regulator. Since claims 22-23 depend from claim 21, they also have allowable subject matter.

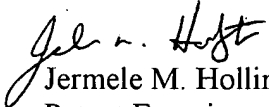

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
